Heated Eyecup

The heated eyecup is used to prevent the eyepiece lenses from fogging up on a cold film set. It has been newly developed taking into account today's field requirements. Due to the robust construction of the eyecup, broken heater rings belong to the past. The ergonomic design decreases the strain on the eye of the cinematographer to a minimum.

Features

- un-breakable heater ring
- heating power not depending on the supply voltage
- two different temperature settings
 - LO for normal use, and for saving current
 - HI for low temperatures down to -18°C / 0°F
- no residual current when switched-off
- LED status indicator
- built-in iris closure
- easy to clip-on to the eyepiece
- ergonomic standard type (*order code 17.100.12*)
- cylindrical type, e.g. for viewfinder extension (*order code 17.100.13*)

Technical Specifications

Supply voltage	10 – 32 V _{DC} (for operation at 12V and 24V cameras) reverse voltage protection, over-voltage and under-voltage protection
Current consumption	approx. 0.54 A at 12 V _{DC} , approx. 0.30 A at 24 V _{DC}

Accessories

- Supply cable 12V for Arriflex 16SR I/II/HS, 35III, 35BL I-IVS, etc. (*order code 17.100.14*)
- Supply cable 24V for Arriflex 435, 535, 535B, 16SR3, etc. (*order code 17.100.15*)
- Hygienic eyecup cover, cushioned, made of soft high-quality glove leather
oval (*order code 17.100.20*, for 17.100.12) or round (*order code 17.100.21*, for 17.100.13)

The heated eyecup is specially suited for our extra light, super wide angle eyepiece with 12-times magnification

- with threaded mount (*order code 17.100.01*)
- with bayonet mount (*order code 17.100.02*)

Please ask for our special brochure about eyepieces and accessories.

What else do we offer ?

VCSC digital 2000 Video Control System Color ● KARDAN Shift & Tilt System ● Universal Angle Bridge Plates ● Support Plates 300 mm and 500 mm ● HT CFK Carbon Fiber Support Rods dia. 15 and 19 mm ● Super 16 Conversions for Arri 16 SR I/II/HS ● 54 PL-Hard Front ● Nikon Hard Front ● Lens Adapter ● Zoom Drives ● Underwater Housings for 16 and 35 mm motion picture cameras and video cameras, etc.

AND

an efficient and competitive Service Department for
modifications, general overhaul, new painting of cameras and lenses.

We would be pleased to help you with any inquiry regarding our products or services.
"Quality made by Denz" and competitive prices are the strong points of our company.
